

ENVIRONMENTALLY FRIENDLY COMPOST WORKSHOP

SATURDAY, JUNE 26, 2021, 9:00 AM

NORTH MISSISSIPPI AGRIBUSINESS CENTER (THE MARKET)
195 PINE GROVE ROAD, SHANNON, MS 38868

Alcorn State University's Professor & Director of Conservation Research Dr. Girish Panicker will present several years of organic and inorganic research work. His outcome on vegetables, fruit, nuts, spices, and condiments will help to improve the economic background of minority farmers. And also to keep them and their soil healthy. Minority farmers are hardly found in fruit, nut, and spices industry. In these areas, they can make more money than vegetables and cereal crops.

Also, Dr. Panicker has worked with the U.S. Army for the last several years. They've developed a technology to produce the best compost which will never pollute the groundwater. He can train farmers on how to make slow-release and environmentally friendly compost using animal and plant waste to boost crop production. Upon learning this process, you can even sell this compost for a higher price as it does not pollute the groundwater.

For more information contact **Dr. Girish Panicker** at **601-877-6598** or **MMFA Director Carolyn Jones** at **662-213-2433**.
